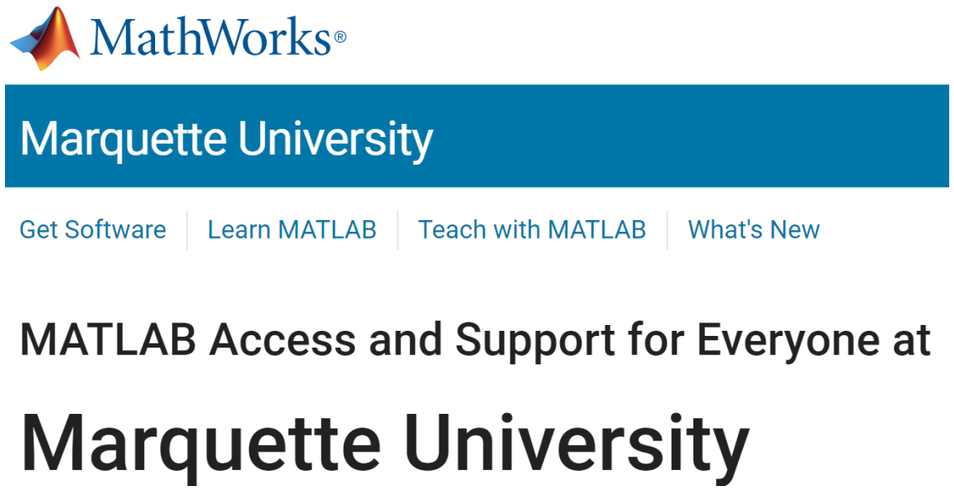
Homework

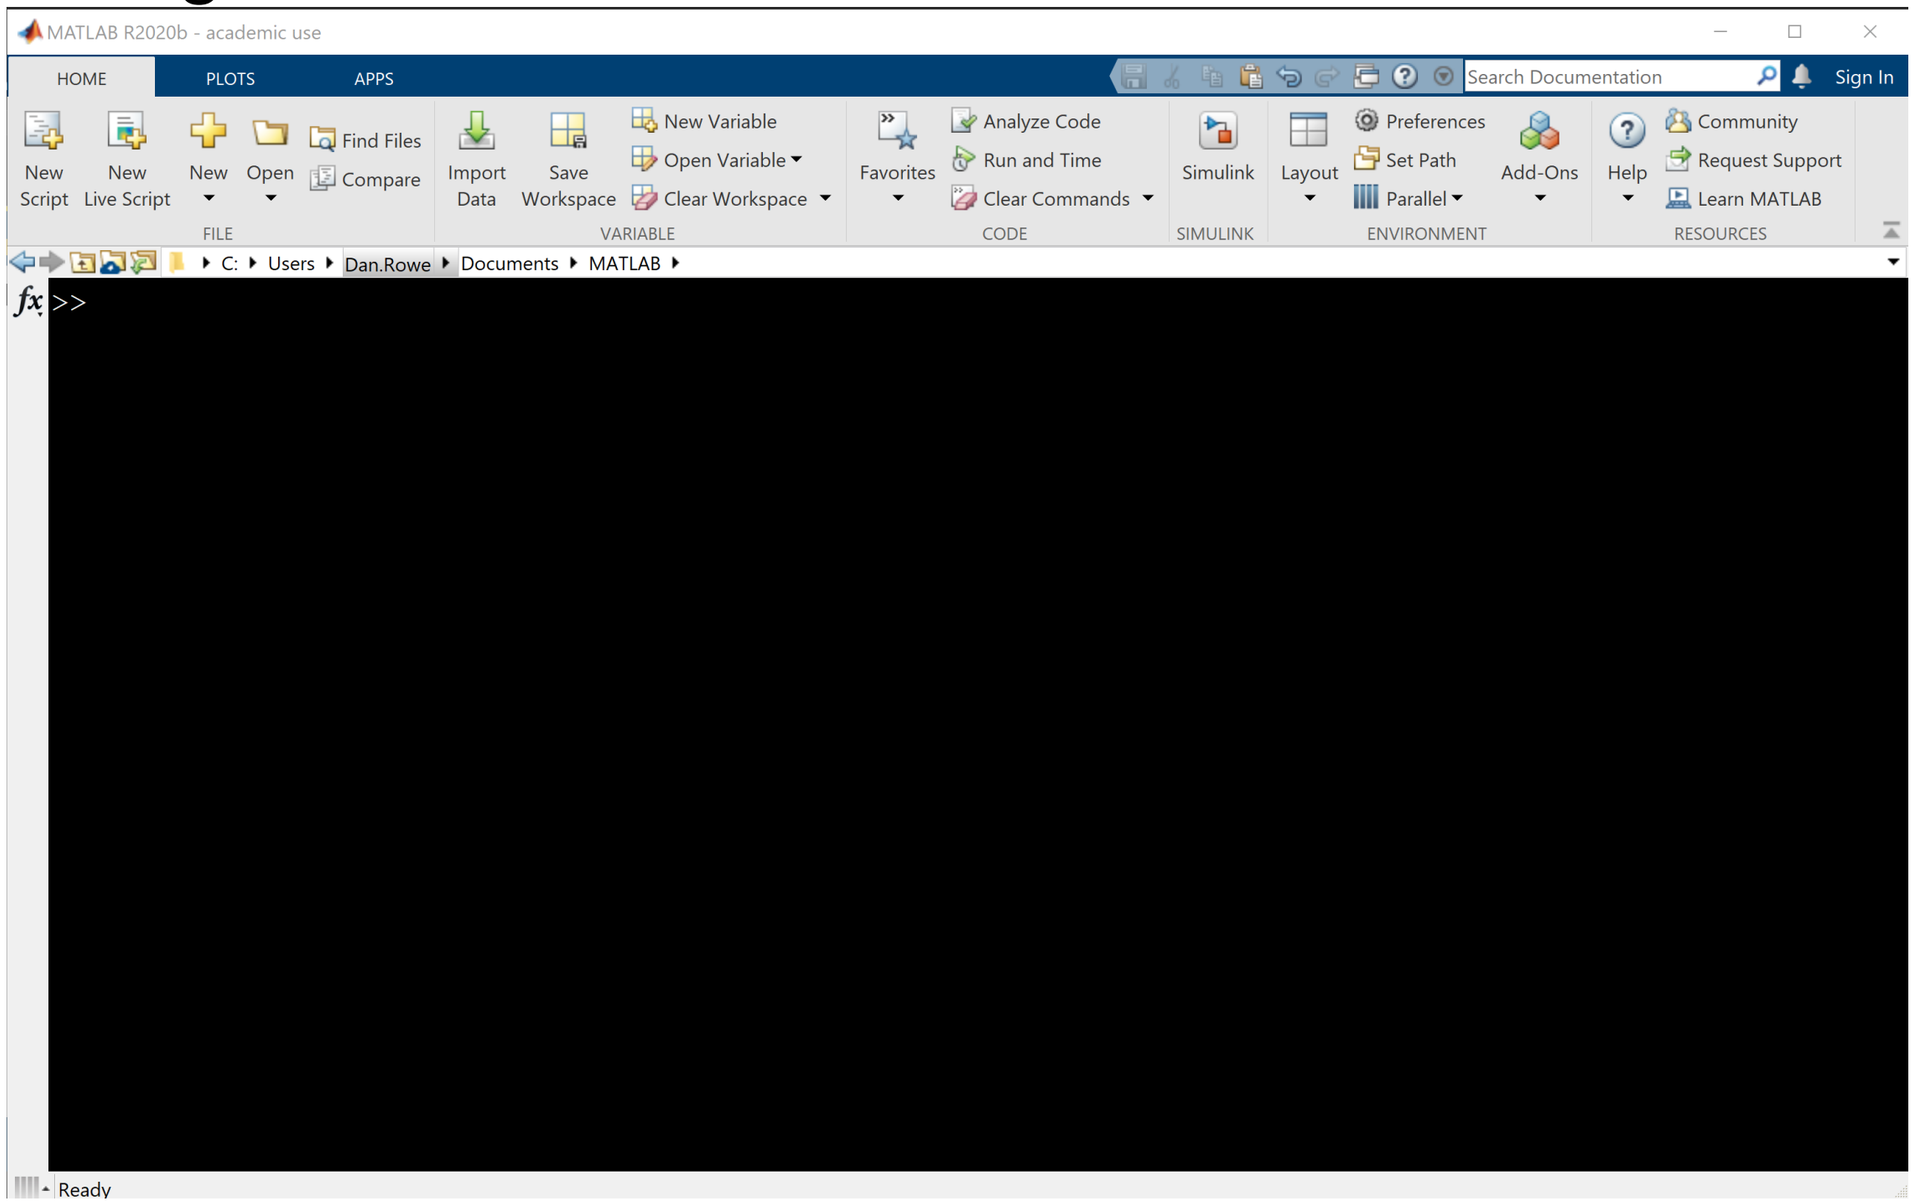
Installing Matlab

For Marquette University students, Matlab is available
to download without cost using the institutions license.
You will need your Marquette email address for this.

https://www.mathworks.com/academia/tah-portal/marquette-university-365291.html



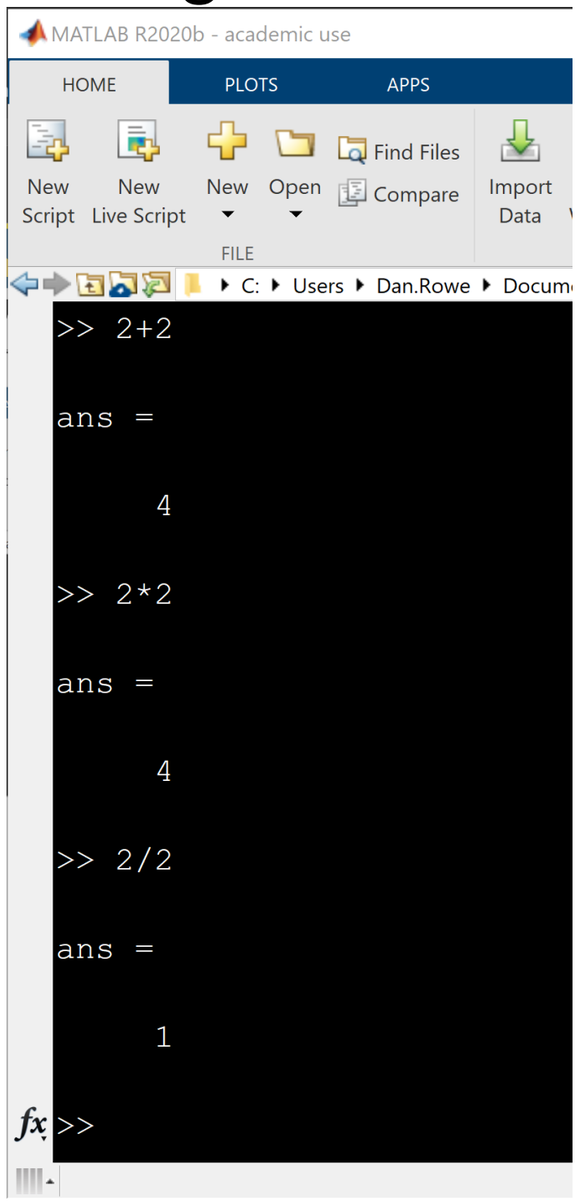
Using Matlab



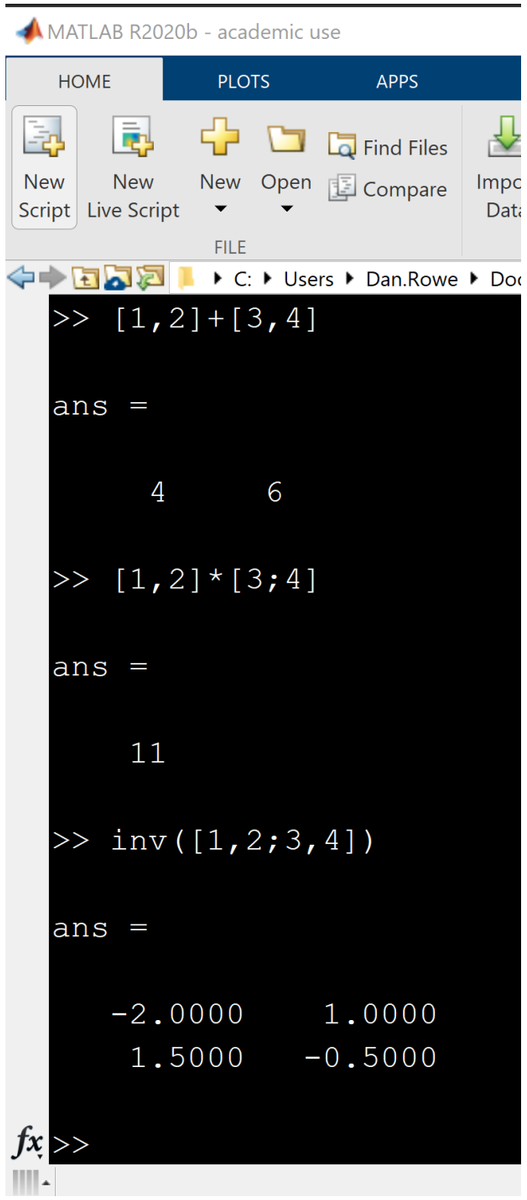
Command Window

You can type directly.

Using Matlab

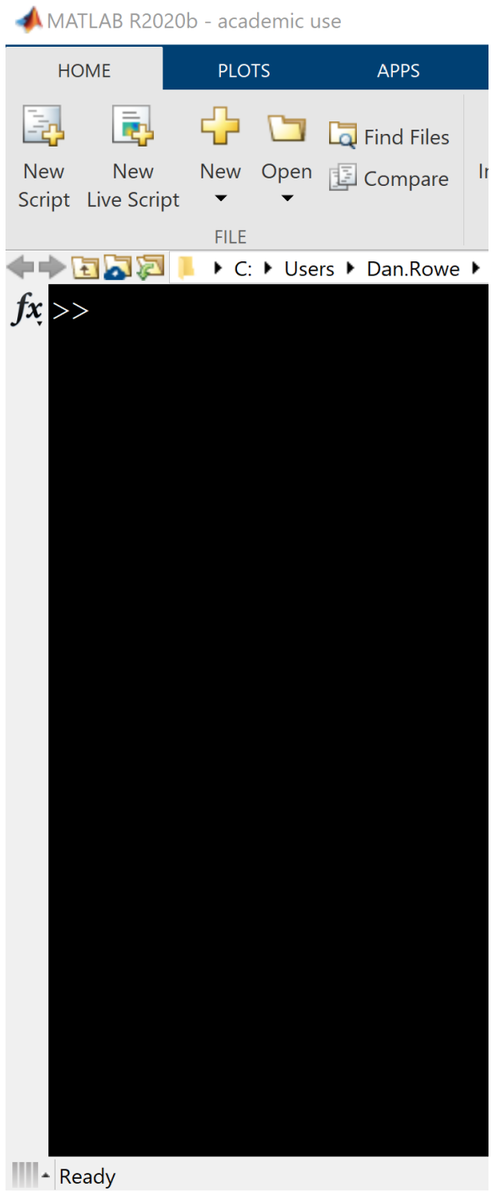


Type directly into the command window for arithmetic



Type directly into the command window for vector and matrix operations.

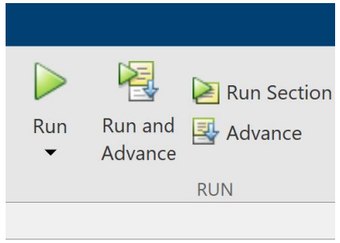
Using Matlab

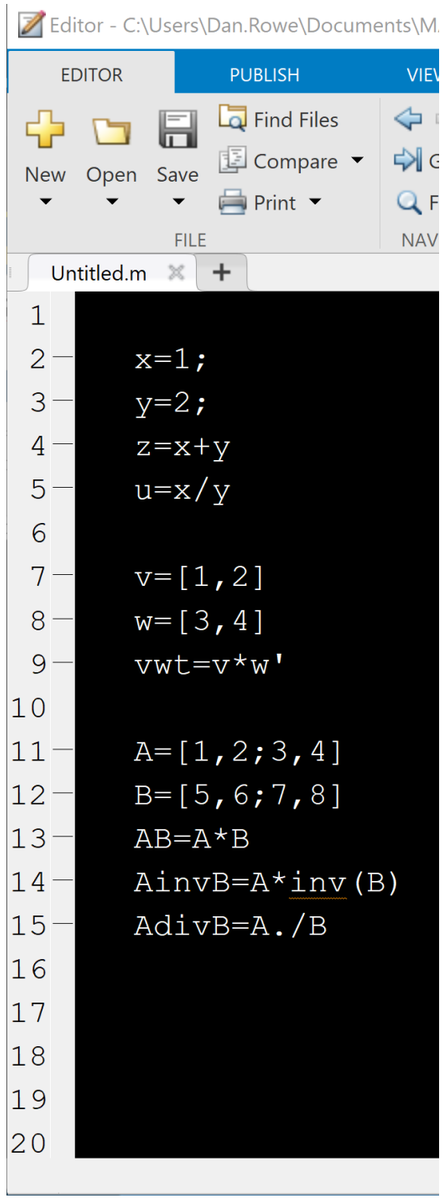


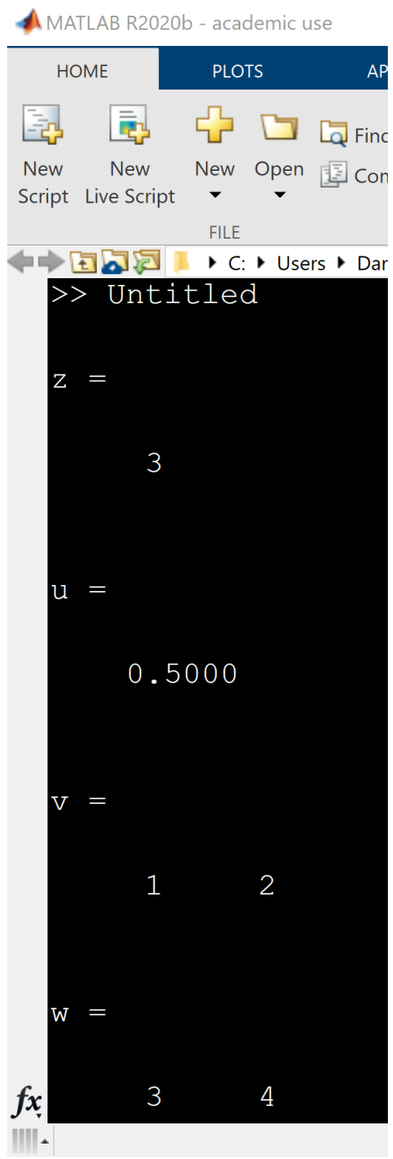
Don't type directly into the command window.

Type into a script.

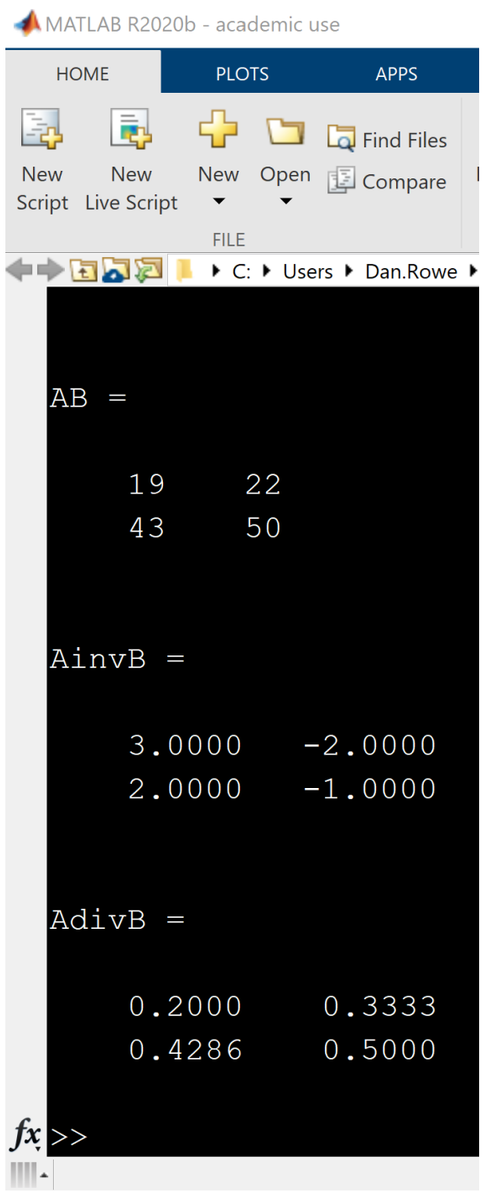
Save and run!



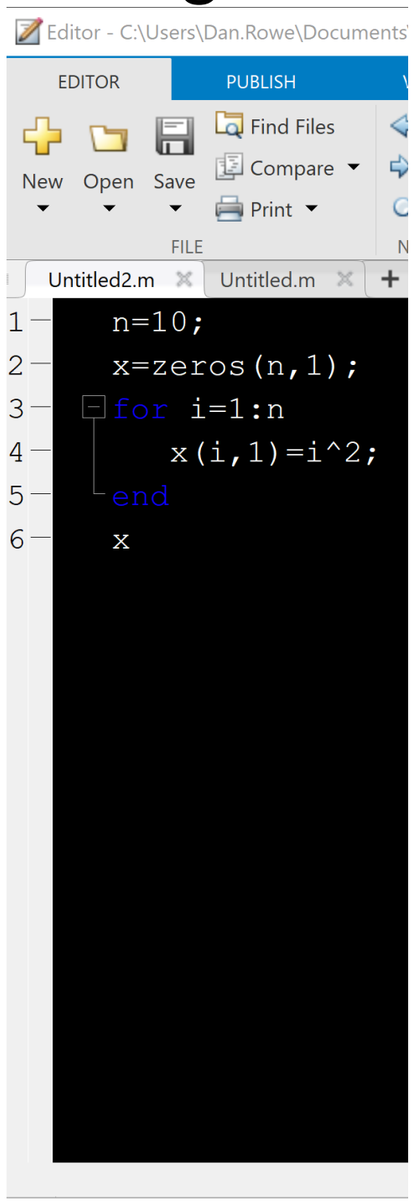


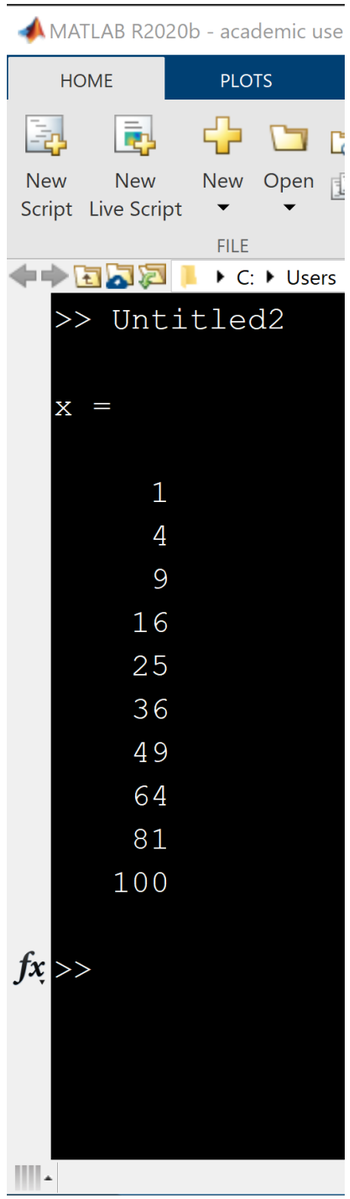


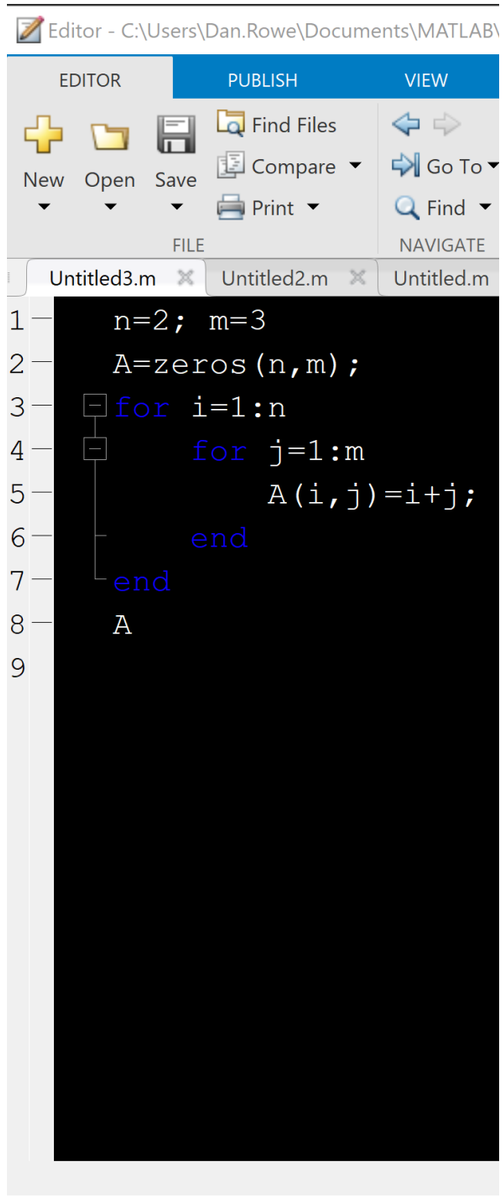
...

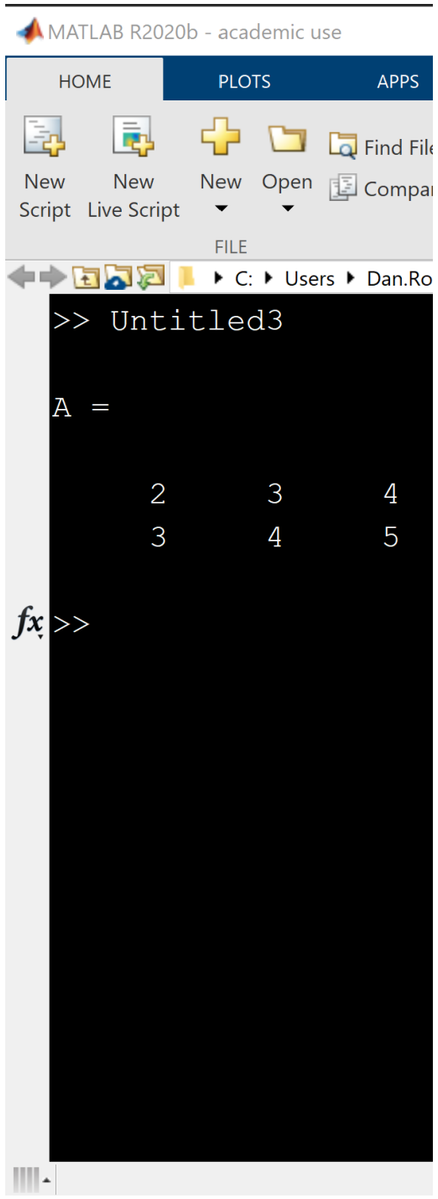


Using Matlab









Using Matlab

Editor - C:\Users\Dan.Rowe\Documents\MATLAB\Untitled4.m

EDITOR | PUBLISH | VIEW

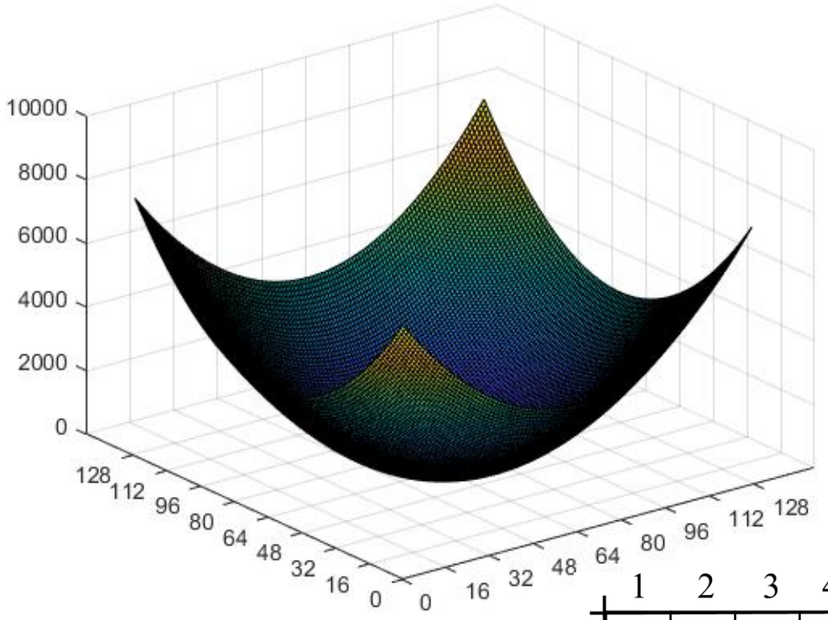
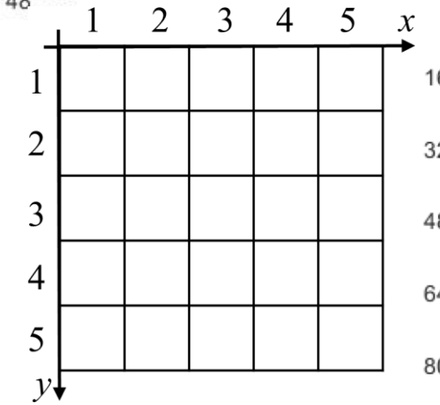
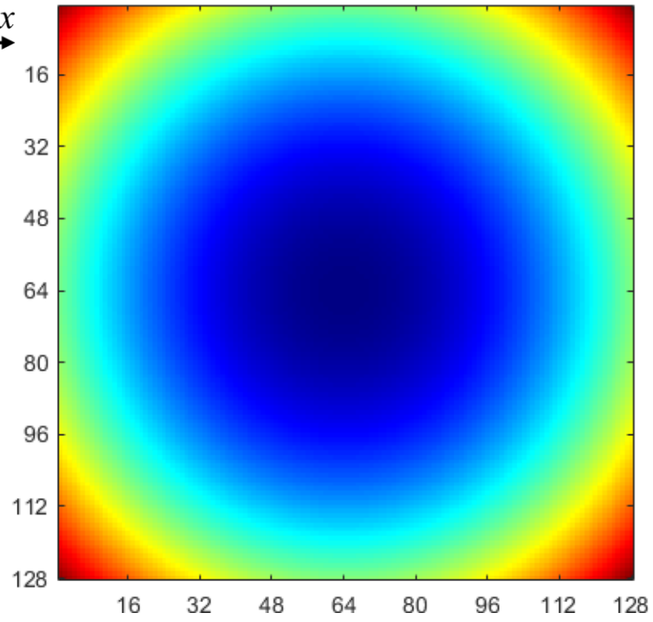
19  set(gca,'xtick',[0:16:128])
20  set(gca,'ytick',[0:16:128])
21  axis image
```



pseudocolor





Saving/Loading from/into Matlab

You can save the worksheet from the quadratic surface as

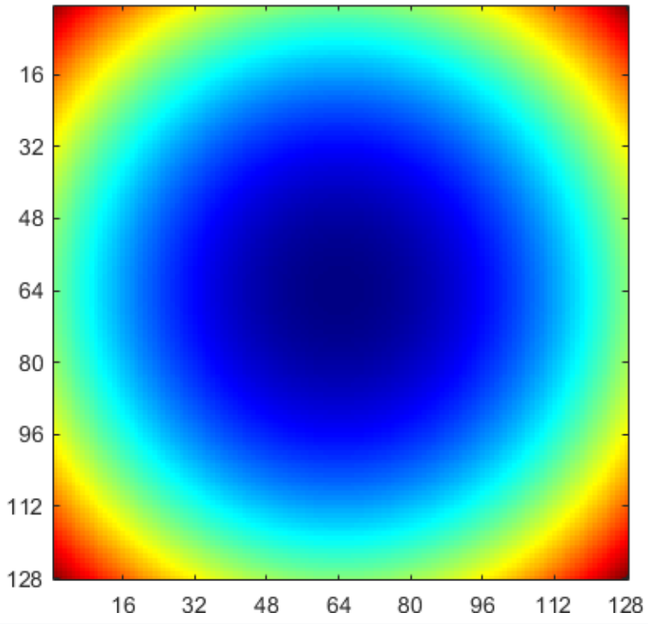
```
save('MySurfData') % saves entire worksheet in MySurfData.mat
```

or save only the variables we want

```
save('Myfxy','fxy','X','Y') % saves fxy, X, Y in file Myfxy.mat
```

or save into a text file

```
vecfxy=reshape(fxy,[n*m,1]);          % array to vector
dlmwrite('MyVecfxy.txt',vecfxy,'\t') % save
load MyVecfxy.txt                     % load txt file
Newfxy=reshape(MyVecfxy,[n,m]);       % vector to array
figure;                               % make image
imagesc(Newfxy), colormap(jet), axis off, axis image
```

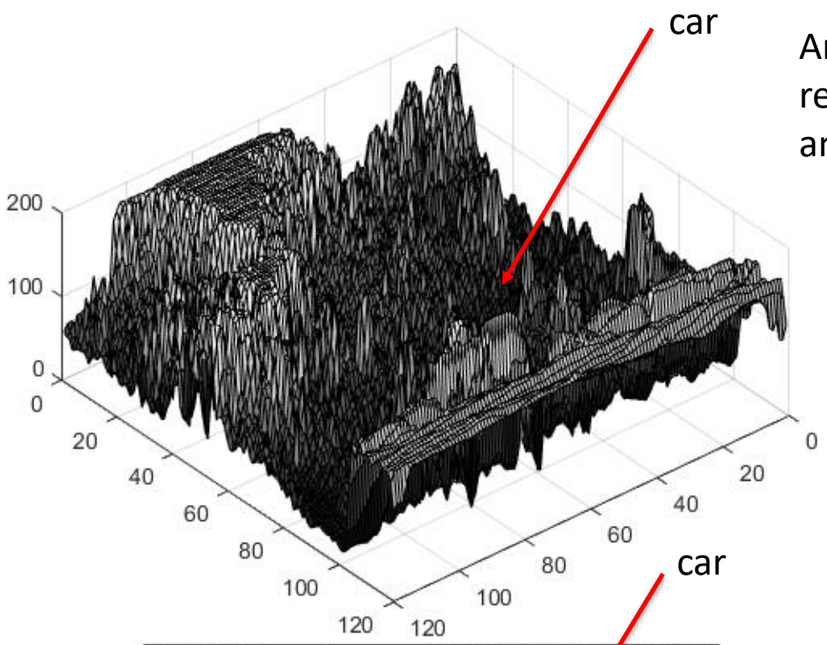


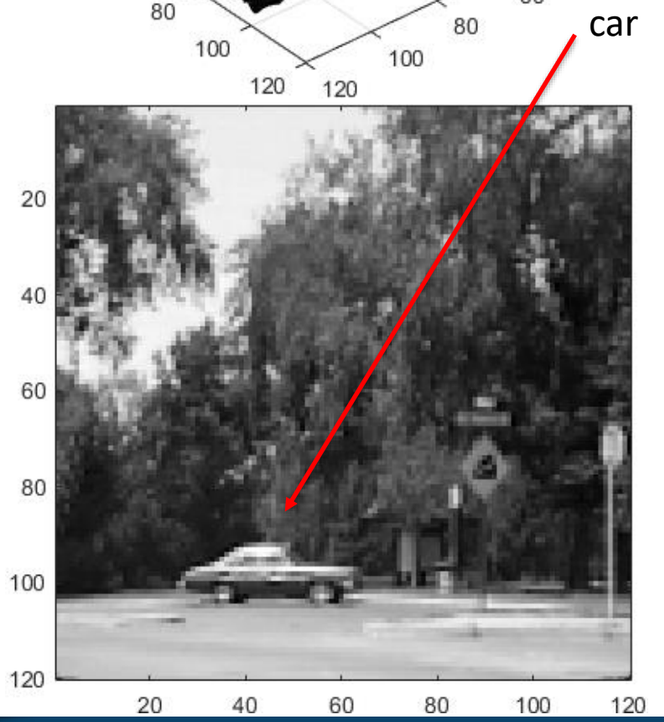
Saving/Loading from/into Matlab

```
load cardata.txt
[n,p]=size(cardata);
nx=sqrt(n);, ny=nx;
fxy=reshape(cardata,[ny,nx])';

x=(1:nx); y=(1:ny);
[X,Y]=meshgrid(x,y);
figure;
surf(X,Y,fliplr(fxy)), colormap(gray)
set(gca,'xtick',[0:20:nx])
set(gca,'ytick',[0:20:ny])
az=140;, el=60;, view(az,el)
print(gcf,'-dtiffn','-r100',['CarScene3D'])

figure;
imagesc(fxy)
axis image, colormap(gray)
set(gca,'xtick',[0:20:nx])
set(gca,'ytick',[0:20:ny])
print(gcf,'-dtiffn','-r100',['CarScene'])
```





An image is a discrete digital representation of a continuous analog function $f(x,y)$.

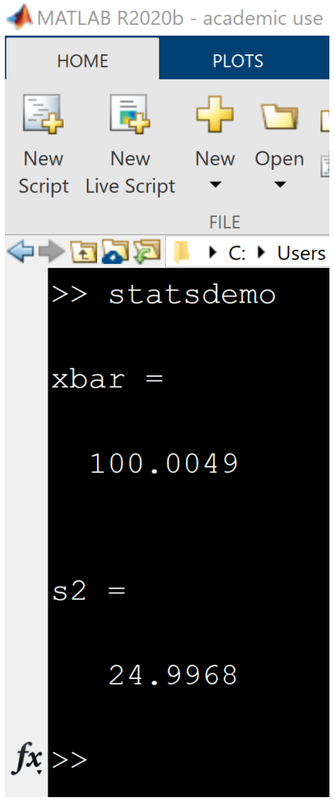
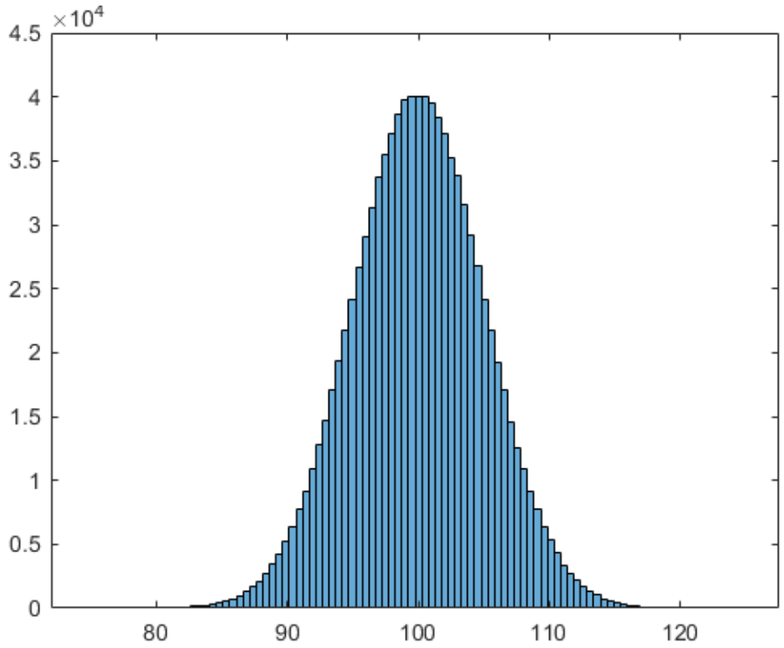
Functions in Matlab

There are many built in functions in Matlab to make your life easier. You can do statistics, math, image analysis, ….

```
n=10^6;
mu=100; sigma2=25;
x=sqrt(sigma2)*randn(n,1)+mu;

xbar=mean(x)
s2=var(x)
figure;
histogram(x,100)
print(gcf,'-dtiffn','-r100',['demoHist'])
```



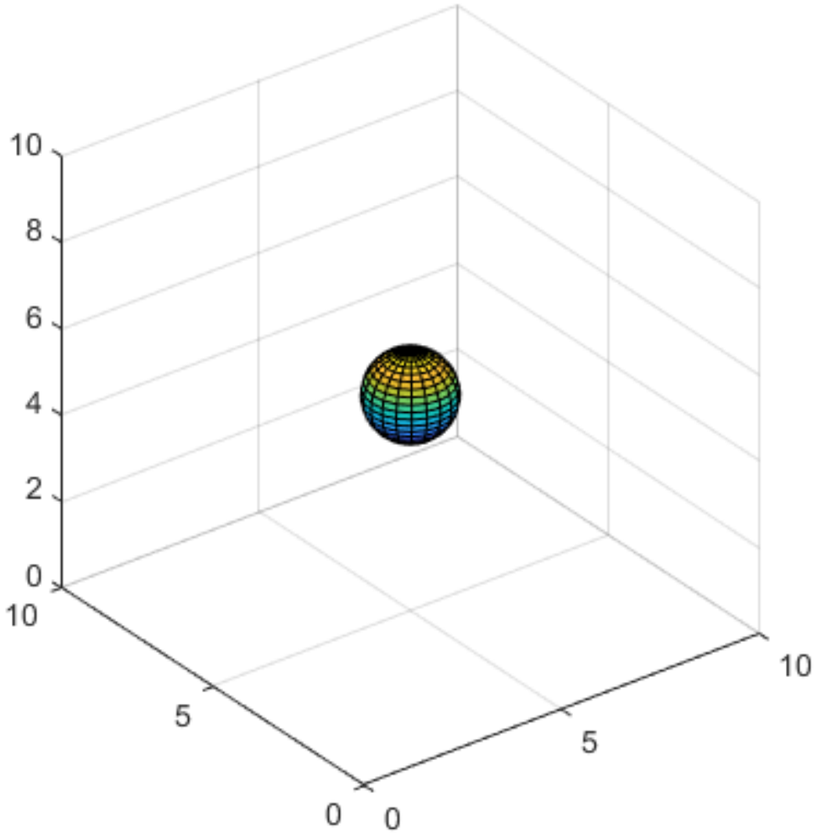


https://www.mathworks.com/content/dam/mathworks/fact-sheet/matlab-basic-functions-reference.pdf

Functions in Matlab

There are many built in functions in Matlab to make your life easier.
You can do statistics, math, image analysis. ….

```
[x,y,z] = sphere;
figure;
for t=1:.1:10
   surf(x+t,y+t,z+t)
   axis square
   xlim([0,10]),ylim([0,10]), zlim([0,10])
   pause(.1)
end
```



https://www.mathworks.com/content/dam/mathworks/fact-sheet/matlab-basic-functions-reference.pdf

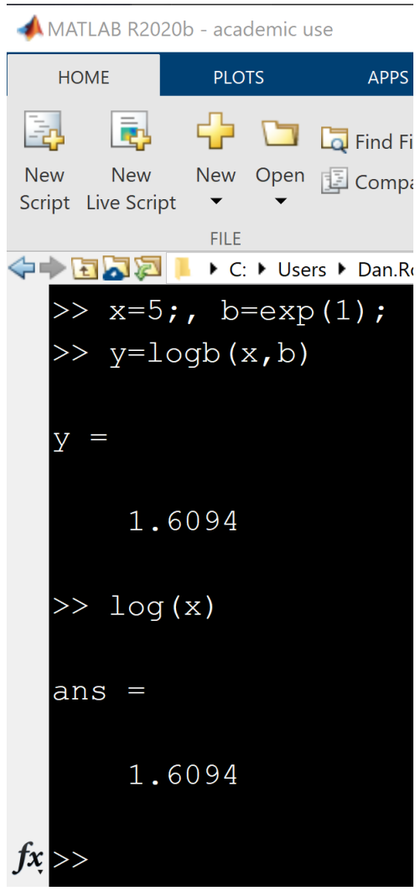
Functions in Matlab

You can create your own functions.

```
% logarithm of x base b
% usage is y=log(x,b)

function y=logb(x,b);

y=log(x)./log(b);
```



Functions in Matlab

The built in functions may come as part of an add-on library

- Statistics and Machine Learning Toolbox™ (Statistics and Machine Learning Toolbox)
- Curve Fitting Toolbox™ (Curve Fitting Toolbox)
- Control System Toolbox™ (Control System Toolbox)
- Signal Processing Toolbox™ (Signal Processing Toolbox)
- Mapping Toolbox™ (Mapping Toolbox)
- System Identification Toolbox™ (System Identification Toolbox)
- Deep Learning Toolbox™ (Deep Learning Toolbox)
- DSP System Toolbox™ (DSP System Toolbox)
- Datafeed Toolbox™ (Datafeed Toolbox)
- Financial Toolbox™ (Financial Toolbox)
- Image Processing Toolbox™ (Image Processing Toolbox)
- Text Analytics Toolbox™ (Text Analytics Toolbox)
- Predictive Maintenance Toolbox™

for the most part we will only use low level functions so we learn how things work.

Discussion

Questions?

The best way to get better at this material is to do.

You don’t get better at it by reading about it, you have to do it for yourself.

Homework 1

1. Write a for loop to add the numbers 1,2,3,4,5,6,7,8,9,10.

2. Make a surface plot of the function

$$f(x,y) = \frac{1}{2\pi} e^{-\frac{1}{2}(x^2+y^2)}$$

3. Run code, change colormap to copper, hot…

```
A = imread('FrMarquette.jpg');

figure;
imagesc(A)
axis image, axis off

I = rgb2gray(A);

figure;
imagesc(I)
axis image, axis off
colormap(gray)

imwrite(I,'GrayMarquette.jpg');
```

Homework 1

4. Read your own image into Matlab.
   a) Convert to grayscale.
   b) Look at the pixel values of a distinctive feature in your image.
   c) load another image of the same size (same device).
   d) average the two images together.
   e) display an image of the average.
   f) Bonus: Repeat for multiple sequential images.
